

Greetings, After reading the NPRM part 97 rules changes I must say that I am fully for the proposed changes. More so for the change in the 2 meter auxiliary station. Not only would this provide Kenwood the space they need to operate in, it would also open the door for VOIP operations such as IRLP and Echolink stations. In my eyes this would only be for the good of amateur radio. I urge you to please consider these proposals.

Thank you,
Daniel Monge AD6SJ
